CREATIVE BIOMART®
Assay Kit

Caspase-3 colorimetric detection Kit

Product Information

Cat.No.	Kit-0164

Product Overview

Higher throughput-measure caspase-3 activity in up to 37 samples in duplicateEfficient-only 50 µl diluted sample needed per wellFlexible-kinetic or end-point assay option

Size

96 wells

Description

The Caspase-3 colorimetric detection kit provides a higher throughput method for measuring caspase-3 activity in up 37 samples in duplicate per kit. The kit is flexible, providing both kinetic or end-point assay options.

Applications

Colorimetric detection, HTS. For the colorimetric measurement of Caspase-3 in cell lysates and buffers from any species.

Storage

Store all components at +4°C, except standard at -20°C.

Kit Components

Half-Area Microtiter plate, Standard, DTT, p-Nitroaniline Calibrator, Reaction buffer concentrate, Substrate concentrate, Stop solution 2.
