CREATIVE BIOMART®
Assay Kit

Mitochondrial Aldehyde Dehydrogenase (ALDH2) Activity Assay Kit

Product Information

Cat.No. Kit-0076

Product Overview

The kit is used to determine mitochondrial aldehyde dehydrogenase activity (ALDH2) in a sample. The enzyme is captured within the wells of the microplate and activity is determined by following the production of NADH in the following ALDH2 catalyzed reaction:acetaldehyde + NAD+ ->acid + NADHThe generation of NADH is coupled to the 1:1 reduction of a reporter dye to yield a colored (yellow) reaction product whose concentration can be monitored by measuring the increase in absorbance at 450 nm (Dye molar extinction coefficient-37000 M-1cm-1). Kit-0076 immunocaptures in each well only native ALDH2 from the chosen sample; this removes all other enzymes, including unrelated aldehyde dehydrogenases.

Size

1 x 96 test

Applications

Functional Studies

Target Species

Reacts with: Mouse, Rat, Cow, Dog, Human

Storage

All components are shipped cold. Reagent dye, Coupler and NAD+ are shipped lyophilized. Before use rehydrate by adding 0.25 mL pure H2O to each tube and vortex each tube thoroughly to dissolve. After hydration unused amounts of these three materials should be stored at -80°C. Store all other components store at 4°C. This kit is Stable for 6 months from receipt.
