BRPF3 Inhibitor Screening Assay Kit

Product Information

Cat.No. Kit-1703

Size

384 reactions

Description

The BRPF3 Inhibitor Screening Assay Kit is designed to measure the inhibition of BRPF3 binding to its substrate. The key to the BRPF3 Inhibitor Screening Assay Kit is the specific binding of the BRPF3 bromodomain to an acetylated histone substrate. With this kit, only three simple steps on a microtiter plate are required. First, a sample containing BRPF3 and an inhibitor of choice is incubated with the biotinylated substrate. Next, acceptor beads are added, then donor beads, followed by reading the Alpha-counts

Applications

Useful for the study of bromodomain binding assays, screening bromodomain inhibitors and selectivity profiling.

Storage

At least 12 months from date of receipt, when stored as directed. Kit components require different storage conditions. Be sure to store each component at the proper temperature upon arrival.
