CREATIVE BIOMART®
Assay Kit

Congo Red Amyloid Stain Kit (Bennhold Method)

Product Information

Product Overview

Amyloid deposits consist of extracellular, non-branching fibrils composed of β-pleated sheet proteins. The Bennhold Congo red method is a classical and stable technique for amyloid detection in tissue sections.
The kit typically includes Congo red staining solution and hematoxylin for counterstaining and is suitable for routine histological identification of amyloid.

Size

5*50 mL

Storage

Store at room temperature, protected from light. Shelf life: 1 year.
