CREATIVE BIOMART®
Assay Kit

Diff-Quick Stain Kit (with Fixative)

Product Information

Product Overview

Diff-Quik staining is a rapid Romanowsky-type method derived from Wright staining and recommended by the WHO for cytological examination. The protocol typically requires less than 90 seconds and produces results comparable to Wright–Giemsa staining.
The kit includes a fixative and is suitable for blood smears, bone marrow smears, vaginal secretions, and exfoliative cytology samples. It is particularly well suited for batch staining, yielding clean backgrounds with minimal precipitate.

Size

3*100 mL

Storage

Store at room temperature, protected from light. Shelf life: 1 year.
