ATAD2A Inhibitor Screening Assay Kit

Product Information

Cat.No. Kit-1681

Size

384 reactions

Description

The ATAD2A Inhibitor Screening Assay Kit is designed to measure the inhibition of ATAD2A binding to its substrate. The key to the ATAD2A Inhibitor Screening Assay Kit is a specific binding of the ATAD2A bromodomain to the acetylated histone substrate. With this kit, only three simple steps on a microtiter plate are required. First, a sample containing ATAD2A and an inhibitor of choice is incubated with the biotinylated substrate for thirty minutes. Next, acceptor beads are added, then donor beads, followed by reading the Alpha-counts.

Applications

Useful for the study of bromodomain binding assays, screening bromodomain inhibitors and selectivity profiling.

Storage

At least 12 months from date of receipt, when stored as directed. Kit components require different storage conditions. Be sure to store each component at the proper temperature upon arrival.
