CREATIVE BIOMART®
Assay Kit

Flagella Stain Kit (Modified Ryu Method)

Product Information

Product Overview

Bacterial flagella are locomotor organelles essential for motility. Flagella staining enables observation of flagellar morphology, number, and distribution, which are important criteria for bacterial identification.
The modified Ryu staining method uses crystal violet as the primary dye and offers stable reagents, simple operation, and reliable interpretation.

Size

100 mL

Storage

Store at room temperature, protected from light. Shelf life: 6 months.
