CREATIVE BIOMART®
Assay Kit

Spore Stain Kit (Scharffer-Fulton Method)

Product Information

Product Overview

Bacterial spores possess low permeability and high refractivity, making them difficult to stain. This cold staining method avoids heating, improving safety and ease of use.
After staining, spores appear green while vegetative cells appear red, providing strong contrast for microscopic observation.

Size

2*50 mL

Storage

Store at room temperature, protected from light. Shelf life: 1 year.
