CREATIVE BIOMART®
Assay Kit

Superoxide Anion Activity Content Assay Kit

Product Information

Product Overview

The Superoxide Anion Activity Content Assay Kit is used to measure the generation or activity level of superoxide anions in samples. The assay is based on a specific reaction between superoxide anions and a chromogenic probe, enabling quantitative analysis by spectrophotometry. It is suitable for oxidative stress research and ROS-related studies.

Size

50t/48s

Storage

Store at 2–8 °C. Shelf life: 6 months.

Detection method Spectrophotometer
