CREATIVE BIOMART®
Assay Kit

# PKC kinase activity Kit

## Product Information

| | |
|---|---|
| **Cat.No.** | Kit-0695 |

**Product Overview**

Non-radioactive measurement of kinase activityFlexible format, kinetic and end-point options availableFast results in< 4.5 hoursEfficiency maximized with only 30 µl diluted sample needed per well

**Size**

96 wells

**Description**

The PKC Kinase activity kit is an efficient assay that utilizes little sample volume. This kit gives you the ability to an end-point or kinetic assay read-out in a convenient 96-well plate based assay and offers easy sample handling protocols. The assay also offers a high signal to background ratio.

**Applications**

Colorimetric detection. For the measurement of PKC kinase activity partially purified, purified, or crude enzyme preparations from any species. Cited sample type includes tissue.

**Storage**

Store all components at +4°C, except active kinase at -80°C.

**Kit Components**

Microtiter plate, Antibody, Conjugate, Antibody dilution buffer, Kinase assay dilution buffer, ATP, Active Kinase, Wash buffer concentrate, TMB Substrate, Stop solution 2
