CREATIVE BIOMART®
Assay Kit

Pectin Esterase (PE) Activity Assay Kit

Product Information

Product Overview

The Pectin Esterase (PE) Activity Assay Kit enables accurate measurement of PE activity in plant tissues and enzyme preparations. PE catalyzes the de-esterification of pectin, playing a key role in cell wall modification and fruit ripening. The assay provides a simple and reproducible method for evaluating PE activity in plant physiology research, food processing, and postharvest quality studies.

Size

50t/48s

Storage

Store at 2–8 °C. Shelf life: 6 months.

Detection method NaOH Titration
