CREATIVE BIOMART®
Assay Kit

Beta-Glucosidase Activity Assay Kit

Product Information

Product Overview

The β-Glucosidase (β-GC) Activity Assay Kit allows accurate measurement of β-glucosidase activity in biological and environmental samples. β-Glucosidase catalyzes the hydrolysis of β-glucosides into glucose and aglycones, which are quantified through a colorimetric or enzymatic reaction. The kit is suitable for studies in plant metabolism, microbial fermentation, and biomass degradation.

Size

50t/24s

Storage

Store at -20 °C. Shelf life: 6 months.

Detection method Spectrophotometer
