Assay Kit

Anti-Human CD8 APC-Cy7 Antibody

Product Information

Applications

The Anti-Human CD8 APC-Cy7 Antibody is a tandem-dye-conjugated monoclonal antibody for the detection of CD8+ cytotoxic T lymphocytes in human biological specimens by flow cytometry. With excitation at 650 nm and emission in the far-red range (~780 nm), APC-Cy7 is ideal for multi-color panels where PE, FITC, PerCP, and APC channels are already occupied. This antibody supports advanced immunophenotyping workflows for immune monitoring, vaccine research, and clinical immunology studies.

Storage

2–8°C

Detection method Flow Cytometry (FCM)

Detection Item

Cytotoxic T Cells
Lymphocyte Subsets

Target Species

Human

Target

CD8

Fluorochrome

APC-Cy7

Shelf Life

12–24 Months

Packing

50/100 Tests/Kit
