CREATIVE BIOMART®
Assay Kit

Anti-Human CD3 FITC Antibody

Product Information

Applications

The Anti-Human CD3 FITC Antibody is a fluorochrome-conjugated monoclonal antibody designed for the identification and enumeration of T lymphocytes in human peripheral blood, bone marrow, and other biological specimens by flow cytometry. CD3 is a defining marker of the T-cell lineage, expressed on all mature T cells as part of the T-cell receptor (TCR) complex. This antibody is suitable for multi-color immunophenotyping panels for immune status monitoring, lymphocyte subset analysis, and immunological research applications.

Storage

2–8°C

Detection method Flow Cytometry (FCM)

Detection Item

Total T Cells
Lymphocyte Subsets

Target Species

Human

Target

CD3

Fluorochrome

FITC

Shelf Life

12–24 Months

Packing

50/100 Tests/Kit
