CREATIVE BIOMART®
Assay Kit

Hemoglobin Assay Kit

Product Information

Cat

Kit-2508

Cat.No. Kit-2508

Product Overview

HEMOGLOBIN (Hb) is made of four globin chains each carrying a heme group. It is carried by red blood cells and transports oxygen from the lungs to the peripheral tissues to maintain the viability of cells. Quantitation of blood hemoglobin has been a key diagnostic parameter for various diseases such as anemia, polycythemia and dehydration. Simple, direct and automation-ready procedures for measuring hemoglobin concentration are becoming popular in Research and Drug Discovery. hemoglobin assay kit is based on an improved Triton/NaOH method, in which the hemoglobin is converted into a uniform colored end product. The intensity of color, measured at 400 nm, is directly proportional to hemoglobin concentration in the sample. The optimized formulation exhibits high sensitivity and is ideal for measuring hemolysis in low hemoglobin samples (e.g. serum and plasma).

Storage

4°C

Shipping

RT

Size

250 tests

Detection method OD400nm

Compatible Sample Types

Blood, serum, plasma, urine etc

Features & Benefits

Sensitive and accurate. Linear detection range 0.9 - 200 mg /dL hemoglobin in 96-well plate assay. Simple and high-throughput. The "mix-and-read" procedure involves addition of a single working

Hemoglobin Assay Kit

reagent and reading the optical density. Can be readily automated as a high-throughput assay in 96-well plates for thousands of samples per day.
Safety. Reagents are non-toxic.
Versatility. Assays can be executed in 96-well plate or cuvet.

Assay time
5 min
Sensitivity
0.9 mg/dL
