CREATIVE BIOMART®
Assay Kit

ATPase Stain Kit (Calcium-Cobalt Method)

Product Information

Product Overview

ATPase catalyzes the hydrolysis of ATP into ADP and inorganic phosphate. Myosin ATPase activity is pH-dependent and can be exploited to differentiate muscle fiber types. This staining method uses controlled pH conditions to visualize fiber-type–specific ATPase activity.

Size

5*50 mL

Storage

Store at 2–8 °C, protected from light. Shelf life: 6 months.
