CREATIVE BIOMART®
Assay Kit

GUS Stain Kit

Product Information

Product Overview

The GUS reporter system is widely used in plant transgenic studies due to minimal endogenous background activity. GUS hydrolyzes X-glucuronide to produce an insoluble blue indigo precipitate, allowing direct visualization of gene expression at tissue and cellular levels. Staining results are observable by eye or microscopy and are used exclusively for research purposes.

Size

100 mL

Storage

Store at -20 °C, protected from light. Shelf life: 6 months.
