CREATIVE BIOMART®
Assay Kit

# Melanin Stain Kit (Ferroc Sulfate Method)

## Product Information

### Product Overview

Melanin is a non-hematogenous endogenous pigment produced by melanocytes and is found in skin, eyes, substantia nigra, and hair follicles.
This kit uses the ferrous sulfate method and contains ferrous sulfate, potassium ferricyanide, and nuclear fast red. After staining, melanin appears dark blue-green, and nuclei appear red.

### Size

3*50 mL

### Storage

Store at room temperature, protected from light. Shelf life: 1 month.
