CREATIVE BIOMART®
Assay Kit

Adenovirus Titer Rapid Quantification Kit

Product Information

Applications

- Titer quantification of adenoviral vector stocks for gene therapy and vaccine development
- Viral seed lot characterization and release testing
- In-process monitoring during upstream production and downstream purification
- Preclinical and clinical-grade vector preparation assessment

Product Overview

This kit provides a rapid method for adenovirus titer determination, delivering results within 48 hours. The assay yields accurate quantification suitable for viral vector manufacturing and quality control.

Features & Benefits

- Turnaround time of 48 hours accelerates process decision-making
- Simplified workflow reduces manual handling compared to traditional TCID50 methods
- Reproducible results support batch-to-batch consistency evaluation
- Suitable for both crude lysates and purified vector preparations
